

# DIGITON VIDEO TRACER

VIDEO PRESENCE ANYWHERE

Video Conference, Video Streaming,  
Video Recording, Video Controlling.  
All necessary hardware and software  
element in one unified system.

Complete video support of events  
**DIGITON VIDEO TRACER**

Hardware and software development of DIGITON R&D Bt.

Hardware and software development of DIGITON R&D Bt.

## Multipoint Video Control Algorithm

Multipoint Video Control Algorithm

### Main Features:

- Full HD display,
- Full HD video recording,
- FULL HD video conference with remote participants, places
- Full HD broadcast to the Internet (video streaming),
- Pre-programmed FULL HD robot cameras,
- Video controller unit to switch and control of the video sources and video target devices for the automated operation,
- FULL HD Video minutes,
- More cameras, more display management,
- Serving even hundreds of participants,
- Conference management software,
- Service of remote interpreters with picture and sound,
- Multipoint Video Control Algorithm: for the coordination of video controlling, video recording, video streaming and video conference,
- Service website to view the video stream: [conferencestreaming.net](http://conferencestreaming.net) or [konferenciastreaming.hu](http://konferenciastreaming.hu),
- CDN-based operation in order to lag-free, high-quality video streaming.
